NICOLE GALLOWAY, CPA **Missouri State Auditor**

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Members of the General Assembly
Jefferson City, Missouri

The objective of this report was to present compiled comparative data on various policy and performance issue areas to:

1. Provide comparative information to Missouri legislators, other elected officials, and citizens.
2. Without comment, or drawing conclusions, allow the comparative data and rankings to stand alone as indicators.
3. Publish the report in a technical format that provides information, and trends when classifiable, without presumptions or findings.

Data collection for this report was performed by the Harry S Truman School of Public Affairs' Institute of Public Policy at the University of Missouri - Columbia.

Many policymakers have found that monitoring performance indicators can provide valuable information regarding policy development, as well as government action. Similar reports conducted elsewhere have been helpful in providing a snapshot as to where states are positioned in relation to each other in critical areas dealing with the economy, health, crime, education, transportation, and civic involvement. Comparative analysis can serve to help measure progress made in relation to others and is becoming increasingly more important for generally establishing the direction states are headed in a variety of policy areas. Also, because statistical information is constantly evolving, updated information can almost always be found from sources drawn upon in this report, as well as from other qualified monitoring sources.

A handwritten signature in black ink that reads "Nicole R. Galloway".

Nicole R. Galloway, CPA
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor: Keriann Wright, MBA, CPA
Director of Audits: Robert Showers, CPA, CGAP
In-Charge Auditor: Terri Erwin, MBA, CGAP

Missouri Statewide Performance Indicators: A National Comparison

Economy

The following indicators were selected to measure the performance of Missouri's economy:

Household Median Income - The median household income is the amount which divides households into two equal groups, one having incomes above that amount and the other having incomes below that amount. The data was provided by the Census Bureau. In 2014, Missouri ranked 36th with a household median income below the national average.

Job Growth Rate - Job growth statistics represent the growth in the number of jobs in the state. The data was obtained from *State rankings 2015: A Statistical View of America*, CQ Press. In 2013-2014, Missouri ranked 22nd with a job growth rate below the national average.

Unemployment Rate - Unemployment rate data is obtained by conducting a monthly sample survey called the Current Population Survey (CPS) to measure the extent of unemployment in the country. There are approximately 110,000 individuals included in the survey. The CPS sample is selected so as to be representative of the entire population of the United States. The survey is designed so that each person age 16 and over who is neither in an institution (for example, correctional facilities and residential nursing and mental health care facilities) nor on active duty in the Armed Forces is counted and classified in only one group. The sum of the employed and the unemployed constitutes the civilian labor force. The data was provided by the Bureau of Labor Statistics. In December 2015, Missouri ranked 19th with an unemployment rate better than the national average.

State and Local Tax Revenue as a Percentage of Personal Income - The amount of state and local taxes collected, divided by personal income. The data was provided by the Urban-Brookings Tax Policy Center. In 2013, Missouri ranked 48th with a revenue percentage lower than the national average.

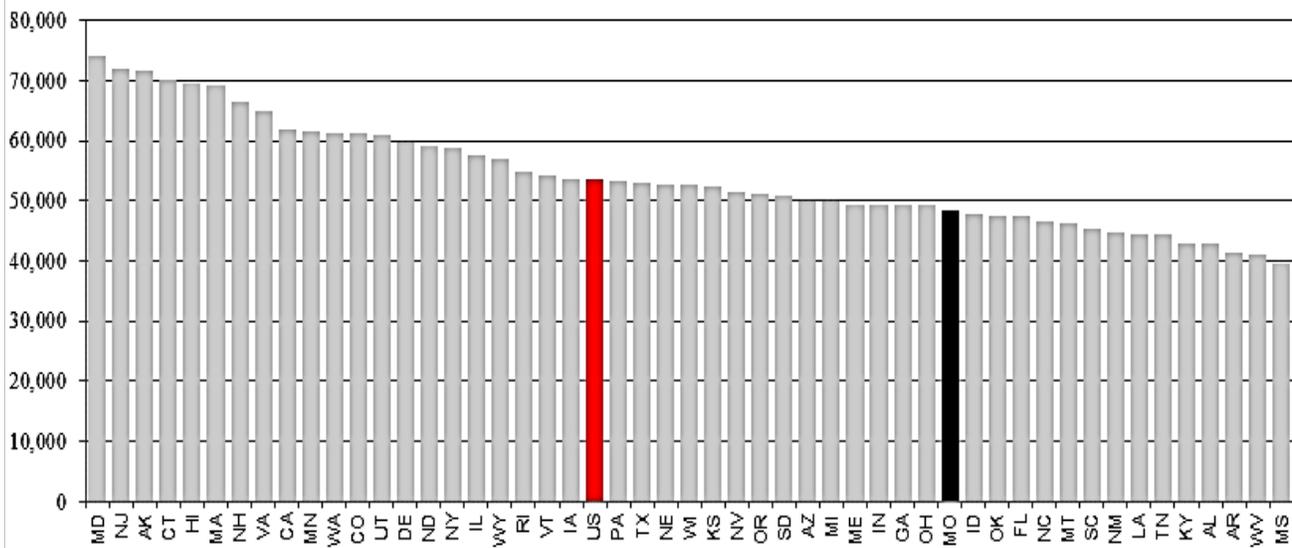

State Cigarette Tax - The amount of tax levied, in dollars, by a state on the sale of a pack of cigarettes. The data was provided by the Urban-Brookings Tax Policy Center and the Federation of Tax Administrators. Missouri continues to rank 50th with the lowest cigarette tax in the country and a state cigarette tax rate significantly below the national average.

Percent of Population in Poverty - The percent of the population that has a yearly income below the federal poverty level. The data was provided by the Census Bureau. In 2014, Missouri ranked 30th with a rate matching the national average.

Percent of Children in Poverty - The percent of children under age 18 living in a household whose yearly income is below the federal poverty level. The data was provided by the Census Bureau. In 2014, Missouri ranked 28th, with a rate slightly less than the national average.

Missouri Statewide Performance Indicators: A National Comparison

Education

The following indicators were selected to measure effectiveness of education in the state:

NAEP Scores - The National Assessment of Educational Progress (NAEP) is the only nationally representative and continuing assessment of what American students know in various subject areas. NAEP assessments are administered uniformly using the same sets of test booklets across the nation. The test serves as a common metric for all states and selected urban districts. The assessment stays mostly the same from year to year, with only carefully documented changes. The data was provided by the National Center for Education Statistics. In 2015, Missouri ranked 24th in 4th grade reading, and 21th in 8th grade reading. In 2015, Missouri ranked 29th in 4th grade math, and 29nd in 8th grade math.

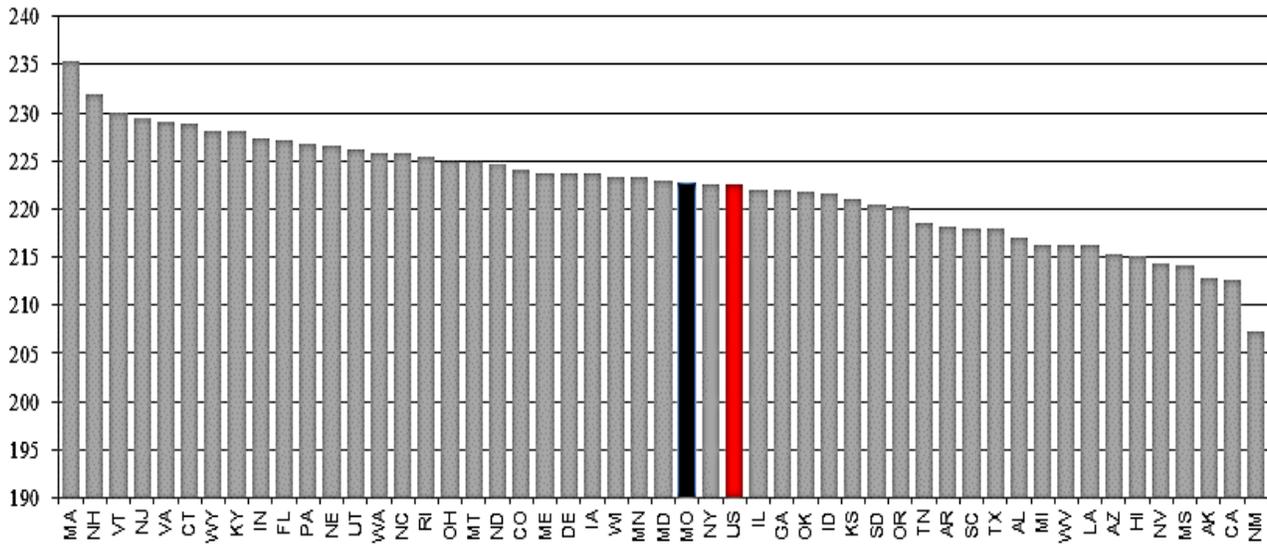

ACT Average Score - The ACT is a national college admissions examination that consists of subject area tests in: English, Mathematics, Reading, and Science plus a writing test. ACT results are accepted by all 4-year colleges and universities in the U.S. The ACT includes 215 multiple-choice questions and takes approximately 3 hours and 30 minutes to complete. The data was provided by ACT, Inc. In 2015, Missouri ranked 23rd.

Percent of Population with High School Diploma - Estimates the percent of the total population that is at least 25 years old with a high school diploma or equivalent. The data was provided by the Census Bureau. In 2014, Missouri ranked 28th.

Percent of Population with Bachelor's Degree - Estimates the percent of the total population that is at least 25 years old with a bachelor's degree or equivalent. The data was provided by the Census Bureau. In 2014, Missouri ranked 32nd.

Missouri Statewide Performance Indicators: A National Comparison

Civic Involvement

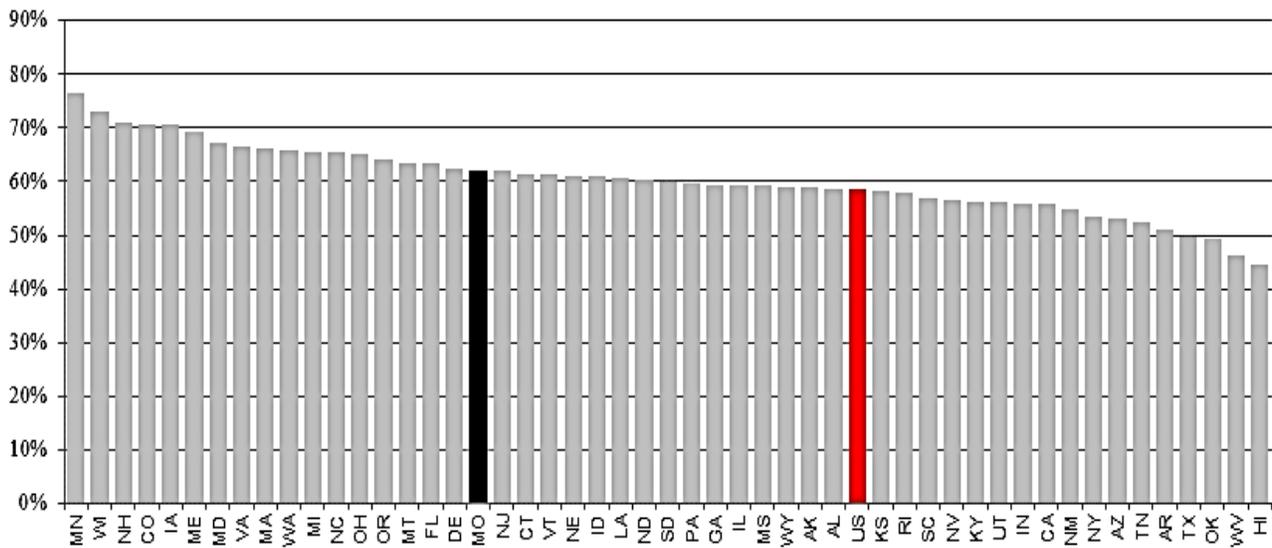

The following indicators were selected to measure the level of civic involvement by Missouri citizens:

Voter Turnout Rate, Presidential Election: 2012 - The percentage of the eligible voting age population who cast a ballot in the 2012 General Presidential Election. The data was provided by the United States Election Project at George Mason University. Missouri ranked 18th, which was a decrease from 10th in the 2008 Presidential election, but a better turnout than the national average.

Voter Turnout Rate, Mid-Term Election: 2014 - The percentage of the eligible voting age population who cast a ballot in the 2014 General Midterm Election. The data was provided by the United States Election Project at George Mason University. Missouri ranked 37th.

Missouri Statewide Performance Indicators: A National Comparison

Health

The following indicators were selected to evaluate the health of Missouri citizens:

Percent of Population who are Adult Smokers - The percentage of adults age 18 and older who report themselves to be smokers. This data was provided by the Centers for Disease Control. In 2014, Missouri ranked 38th, which is an improvement from being ranked 47th in 2008; however, the rate still exceeds the national average.

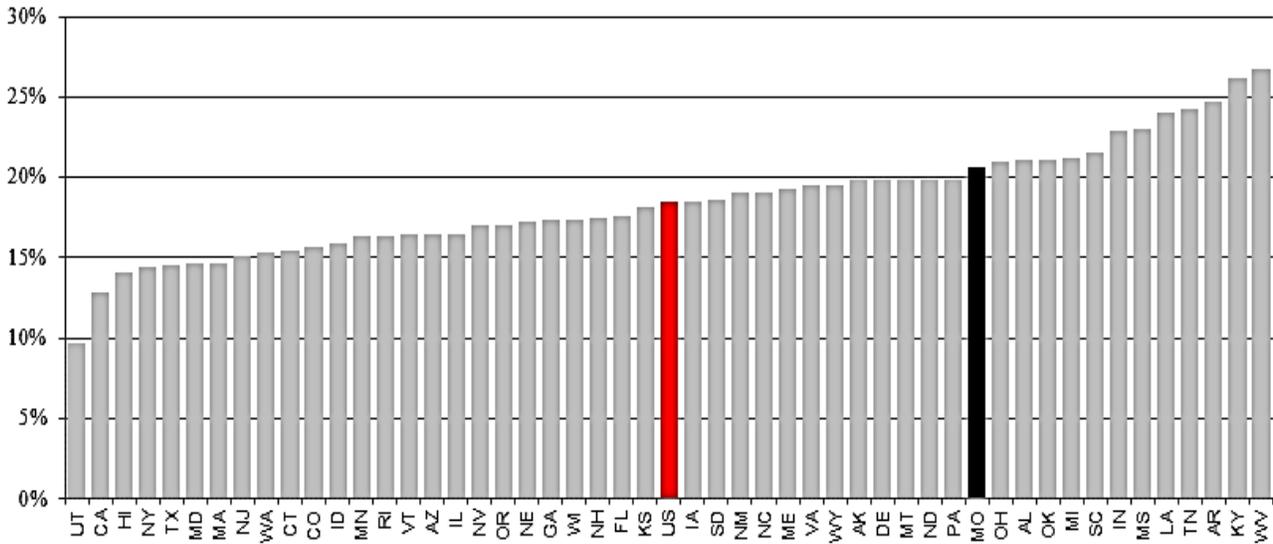

Percent of Population who are Overweight or Obese - The percent of the population who have a body mass index (BMI) of 30 or greater. The data was provided by the Centers for Disease Control. In 2014, Missouri ranked 28th.

Teen Birth Rate - The number of births to teenage women, age 15 to 19, per 1,000 women in the state. The data was provided by the Centers for Disease Control. In 2014, Missouri ranked 32nd.

Percent of Population without Health Insurance - The percent of the population that does not have any form of health insurance. The data was provided by the Census Bureau. In 2014, Missouri ranked 29th, with a rate matching the national average.

Missouri Statewide Performance Indicators: A National Comparison

Crime

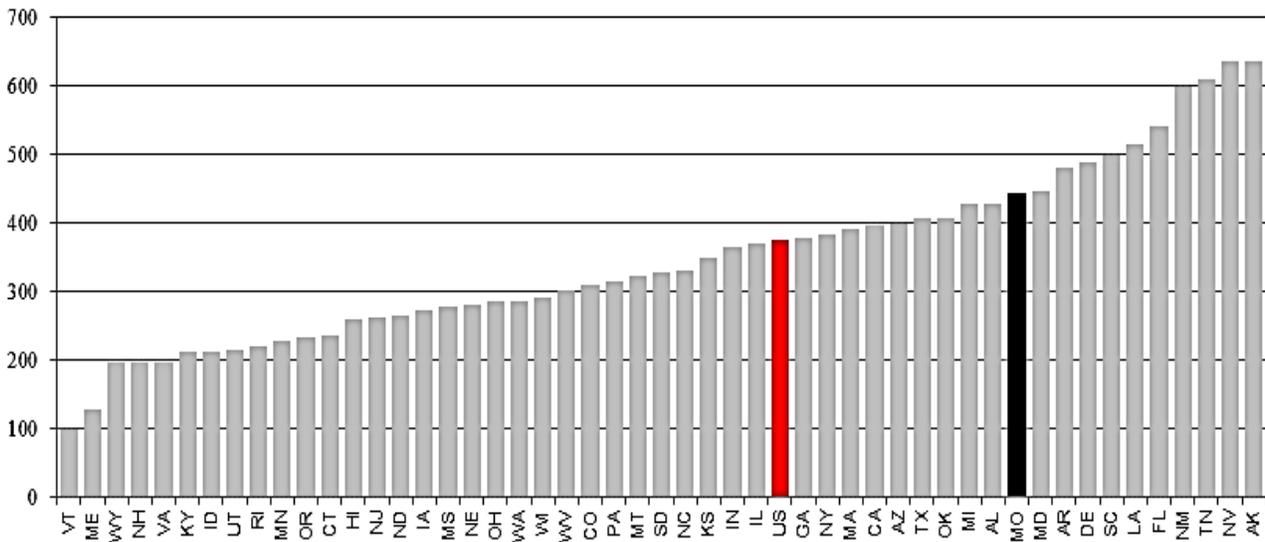

The following indicators were selected to measure the frequency of crime in the state:

Violent Crime Rate - The violent crime rate is composed of four offenses: murder and non-negligent manslaughter, forcible rape, robbery, and aggravated assault. Violent crimes are defined as those offenses involving force or threat of force. The rate is computed as the number of these violent crimes per 100,000 inhabitants. The data was provided by the Federal Bureau of Investigation. In 2014, Missouri ranked 40th with a violent crime rate higher than the national average.

Property Crime Rate - The property crime rate is composed of offenses such as burglary, larceny-theft, motor vehicle theft, and arson. There is no force or threat of force against the victims. The rate is computed as the number of these property crimes per 100,000 inhabitants. The data was provided by the Federal Bureau of Investigation. In 2014, Missouri ranked 35th with a property crime rate higher than the national average.

Missouri Statewide Performance Indicators: A National Comparison

Transportation

The following indicators were selected to measure transportation funding and the condition of Missouri's roads and bridges:

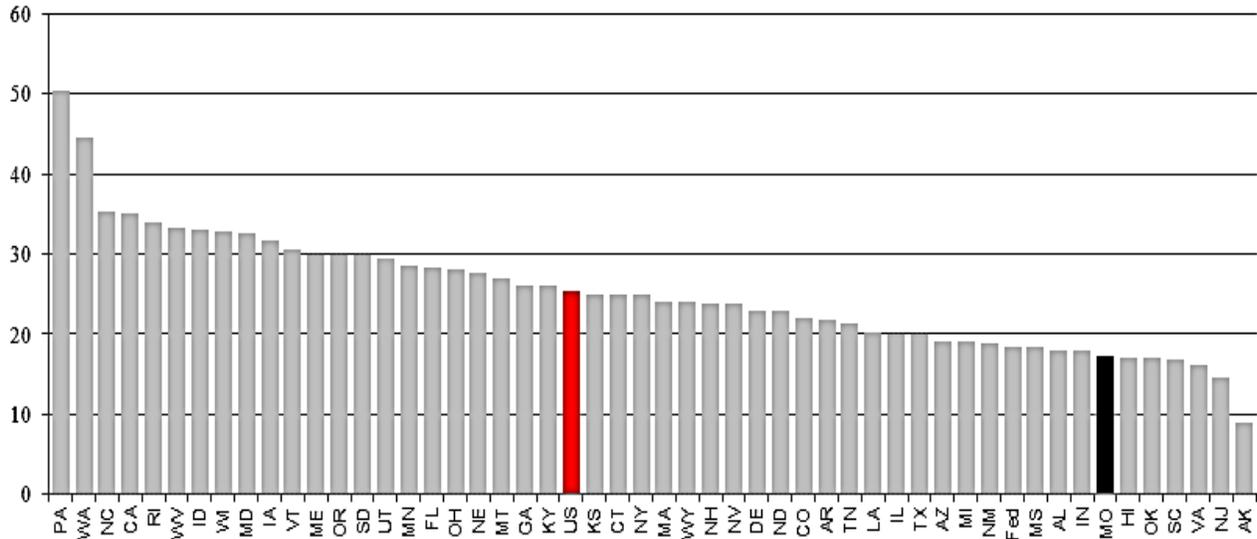

State Gas Tax - The amount of tax levied, in cents, by a state on the sale of one gallon of gasoline. The data was provided by the Federation of Tax Administrations and the Tax Policy Center. In 2016, Missouri ranked 44th with a gas tax below the national average.

Percent of Roads in Mediocre or Poor Condition - The percent of all roadways in a state that are in mediocre or poor condition as defined by the Bureau of Transportation Statistics. In 2013, Missouri ranked 27th, with a rate matching the national average.

Percent of Bridges that are Deficient or Functionally Obsolete - The percent of bridges that are structurally deficient or functionally obsolete as defined by the Federal Highway Administration. The Bureau of Transportation Statistics provided the data for this indicator. In 2014, Missouri ranked 33rd.
